

TESTAMONIAL, GEEKIT GROUP

28 January 2009

Geek IT Group built www.aiia.biz for us as the platform for the services and benefits program we operate for the member organisations of the Australian Information Industry Association (AIIA). The platform includes a custom administration portal allowing multiple content providers secure access to control their own content.

GeekIT Group delivered the site on time and on budget. Other HTML coding experts have complimented us on the quality of GeekIT Group's HTML code for www.aiia.biz which speaks to the quality of GeekIT's work. As well as Mary's enthusiasm and engagement, we have found their technical experts to be both pro-active and responsive. This has been vitally important support for us during our first year of operation.

Ben Shepherd
Managing Director
