

27 January 2010

We engaged geekIT because of their experience with property developers and their understanding of our needs from a sales and marketing standpoint.

During the engagement they were able to educate us on the application that was best for us. We are using the geekIT content management system which is used by our internal admin and sales team to update content. geekIT worked within our budget and delivered in full and on time. It has been an enjoyable experience working with the team.

The [www.voguesouthyarra.com.au](http://www.voguesouthyarra.com.au) is a fundamental tool for our business. We had 2000 unique hits in the first few weeks it went live and many enquiries as a result. The investment with geekIT paid off ten fold.

I highly recommend geekIT to anyone who is looking to work with a professional and competent team.
