

SIGMA PHARMACEUTICALS (AUSTRALIA) PTY LTD

January 29, 2010

To Whom It May Concern:

geekIT

geekIT were engaged to develop three projects for Sigma Pharmaceuticals. Each project involved multiple stakeholders. Their approach was seamless, effortless and collaborative.

I have worked with geekIT over the last 3 years on different online projects and it is reassuring to work with a company that can demystify the tech jargon, get on with the job and meet deadlines. As a Senior Brand Manager, this is important.

geekIT are easy to work with and they are intuitive in understanding and factoring in scalable features to ensure we reach a cost effective outcome. In today's economy where ROI is a fundamental KPI, it is refreshing to work with a digital agency who genuinely care about your business and you.
